Experience

Tinkoff Bank
Software Developer   Mar. 2021 – Now

Working in Special Projects team (project.tinkoff.ru), currently responsible for creating frontend layer of projects from scratch.

Kaspersky Lab
Software Developer   Mar. 2018 – Mar. 2021

Started as an internship and turned into a full time position. Participated in two projects:

React-based content editor

This content editor is used for content creation which is deployed on kaspersky.com website
- Documentation, refactoring, testing components creation, UI, data handling of legacy code
- Participated in rewrite of project - created various critical components like inbound and outbound data validation using JSON Schema and data migration tool

Partner Portal

Development and support of partners.kaspersky.com website
- Supported legacy code for old Partner Portal and developed e2e regression testing system
- Participated in migration to a new platform – website for one region was built under 3 months
- Created various components for portal with advanced business logic using HTML, JavaScript and CSS which are used on day-to-day basis by customers

Projects

shortify (Website, Github)

Fullstack (Express/React) link shortener app deployed on Google Cloud. Server-side session management, MongoDB as database, Email/password or Google OAuth 2.0 authentication.

rxmask.js (Playground, Github, npmjs)

Advanced input mask package published on npmjs. HTML embeddable. Allows to specify format for every character.

Weather Mood Radio (Playground, Github)

Radio that picks Lo-Fi tracks from SoundCloud according to current weather, day time and season at your geolocation.
